

K-Startup Grand Challenge 2024
Application Form

※ Please be clear and specific while completing the form within 30 pages.
※ Feel free to add more items while completing the format.

1. Overview of the Startup

Company Name	Linetype Technologies	Representative (CEO) / Nationality	Lim Hui Shi (Alice) / Singaporean
Date of Establishment	23/04/23	Technology Sector	Big data, E-commerce, Metaverse, social networking
Investment Round	Pre seed	Investment (USD)	20k USD
Sales of last three years (USD)	2021: NA	2022: NA	2024 (from beta test period): SGD 1500
Metrics currently manages	No. of Models No. of Traffic No. of Downloads No. of Users	Measured value of key metrics	No. of Models: 100+ No. of Traffic: 500+ No. of Users: 40+
Elevator Pitch	Linetype is on a mission to democratize interior design, leveraging automation to streamline and integrating gamification into spatial design. Our platform empowers anyone to become a designer, offering intuitive tools and a vibrant community to bring their visions to life.		
Partnerships	AWS, Google, Enterprise Singapore, Pollinate		

Awards	<u>Startup</u> SGD\$50k SG Founder Grant SGD\$1000 AWS For Startup Programme SGD\$2000 Google for Startup Programme
---------------	---

2. Feasibility and Competitiveness

1) Problems trying to solve / Pain point

Linetype addresses critical gaps in the market that, if left unaddressed, result in significant missed revenue opportunities. The current shift in consumer trends towards independently driven interior design highlights a growing demand for personalized and unique spaces. While consumers are increasingly seeking these customized solutions, the Korean market remains largely entrenched in traditional turnkey systems (Yun, 2019).

The market for interior design solutions holds significant potential for growth, largely due to the increasing desire of individuals to break away from traditional turnkey systems. As preferences shift towards meaningful, well-designed, and personalized spaces, companies that fail to adapt to this demand will likely see a decline in market share. This evolving landscape presents a substantial opportunity for platforms like Linetype to capture and expand the market presence by offering innovative, customizable design solutions that cater to the growing trend of individuality in interior design.

Secondly, the COVID-19 pandemic has heightened everyday people's awareness of their living spaces, fueling a desire for unique, personally curated environments. Brands that fail to cater to this growing demand risk missing out on substantial consumer spending in the home design market.

Next, furniture brands aiming to expand often struggle to connect with customers who desire personalized design experiences. This disconnect translates into lost sales and stunted brand growth.

Finally, by creating new market opportunities within personalized and innovative furniture design, Linetype empowers brands to capture a previously untapped segment, leading to increased revenues and customer loyalty. In summary, not embracing these trends results in significant financial losses and competitive disadvantage.

2) Analysis of home country's market and insight from entrepreneur

After gaining deep insights into the interior design market of Singapore, where the industry is rapidly evolving with a strong shift towards digital solutions and personalized design experiences. My mission is to bridge the gap between imagination and reality by providing a platform that empowers everyone to design their own spaces, making high-quality design accessible to all. The vision is to revolutionize the global spatial design landscape, fostering creativity and innovation. By showcasing who we are—a passionate, innovative team dedicated to transforming how the world approaches spatial design—we aim to inspire and empower designers and consumers alike, proving that anyone can create inspiring and functional spaces.

Singapore's market for interior design has shown significant growth, particularly among design professionals. This trend is evidenced by the rise of entrepreneurs transitioning into interior design, the surge of digital platforms like Vermillion connecting designers and makers, and the overall shift towards digital methods for efficiency and collaboration.

Middle Article Link: <https://www.straitstimes.com/life/home-design/reno-revolution-interior-design-at-a-click>

Right Article Link: <https://www.straitstimes.com/life/new-online-platform-vermillion-connects-makers-in-asia-to-interior-designers>

A key issue in Singapore is the absence of proper design documentation, which causes stress for consumers and economic inefficiencies for designers. Consumers in this market seek consolidated methods to view products quickly, while vendors desire robust databases to gather insights and data.

With the rise of high-rise living and significant construction projects in both Singapore and South Korea, the demand for construction and design services is poised to increase substantially. In Singapore, nearly 100,000 private and public homes are expected to be completed between 2023 and 2025, with almost 40,000 ready in 2023 alone, marking the highest completion rate in five years (Ng, 2023). Similarly, South Korea plans to provide 2.7 million new homes nationwide over the next five years, with almost 60% of these new homes concentrated in the Greater Seoul area (Yon-se, 2022). This surge in construction underscores the growing need for innovative design solutions and efficient project management, presenting a prime opportunity for platforms like Linetype to thrive and lead the market transformation.

Both Singapore and South Korea are ideal testing grounds for tech startups due to the

ir technologically advanced populations and market readiness. Singapore, with its high internet penetration rate and tech-savvy consumers, has provided Linetype with a robust platform to develop and refine our technology. Similarly, South Korea boasts one of the highest internet penetration rates globally, with around 97.2 percent of its population using the internet, and one of the highest average mobile internet connection speeds worldwide (Jobst, 2024).

As a startup, Linetype has navigated Singapore's vibrant ecosystem, known for its supportive infrastructure and entrepreneurial spirit. Singapore's ascent to the eighth position in Startup Genome's global startup ecosystem ranking underscores its growing prominence as a hub for innovation and business growth (Goh, 2023). Linetype has benefited from Singapore's strategic positioning, ranking third in Asia behind Tel Aviv and Beijing, and has leveraged this ecosystem to refine its offerings and expand its market reach.

Linetype, an online spatial design platform, is poised to capitalize on these trends. Our platform empowers anyone to design their own space, creating an unbiased connection between designers, vendors, and consumers. By standardizing the industry and leveling the playing field for independent and small business owners, Linetype encourages healthy competition and innovation.

Given the projected growth of the global interior design market to USD 79.6 billion by 2030, with a CAGR of 7.4% from 2023-2030, now is an opportune time for Linetype to enter the South Korean market. The similarities in market trends between Singapore and South Korea, the technological advancement of both countries, and Linetype's proven success in Singapore make this the perfect moment for expansion into South Korea, ensuring rapid growth and market penetration.

3) Product, item and service

Linetype offers a comprehensive platform designed to meet the needs of both vendors and designers. Our key features include:

1. **Quick Procurement Tool:** This tool allows users to easily create detailed design proposals, enhancing collaboration and streamlining the design process.
2. **Cross Functional Real-Life 3D Models:** Our platform provides access to a vast library of real-life 3D models, enabling designers to visualize their projects accurately.
3. **Gamification to Designing:** Currently in development, this innovative tool will empower everyone—from novices to experienced designers—to create and customize interior designs effortlessly.
4. **Automated Commission:** For every purchase we ensure transparent transaction and hassle-free compensation processes for all parties with just a few clicks.

We also offer robust support services:

- **3D Digitization Support:** Our dedicated team assists vendors in digitizing their assets, ensuring seamless integration into our platform. We have experts on our team that can handle cases using a variety of softwares from 3Ds, AutoCAD, Rhino, BIM etc allow all asset to integrate into any software the person chooses
- **Ongoing Technical Development:** Our tech team is committed to continuously improving through hyper localization and expanding our platform, ensuring it remains at the forefront of the industry.

With these tools and services, Linetype is ready to revolutionize the interior design market, making it accessible and efficient for all users.

4) Target customer and business model(B2B, B2C, B2G..)

Linetype operates on a B2B2C model, catering to both businesses and end consumers. Our primary target customers include:

1. **Everyday Consumers:** Individuals looking to personalize their living spaces benefit from our user-friendly interior modeling game and access to professional design tools.
 - a. We are looking to Target middle households in South Korea which poses a significant size with the total number of households in 2022 amounting to 22,383,187 and amongst them the single-man household of 7,502,350 is a sizable testing ground (Statistics KOREA, 2024).
2. **Furniture and Home Decor Vendors:** These businesses leverage our platform to digitize their product offerings, reaching a broader audience and gaining valuable insights through our database.
3. **Interior Designers and Design Professionals:** They use Linetype to access a wide range of real-life 3D models, create detailed proposals, and collaborate with clients more effectively.

Our business model involves:

- **Subscription Fees:** Interior designers and vendors subscribe to our platform to access premium features such as unlimited creation of project files and downloading of models and services such as customer service.
- **Transaction/Commission Fees:** We charge a small fee on transactions facilitated through our platform between designers and consumers.
- **Vendor Services:** Additional services for vendors, such as asset digitization and advanced analytics, are offered for a fee.

By connecting designers, vendors, and consumers on a single platform, Linetype creates a seamless, efficient, and **innovative ecosystem** for interior design. Linetype is more than a feature, does not matter if you are an experienced designer or someone who is just designing your own room linetype is there

5) Global competitors and competitiveness

Linetype stands out in the competitive landscape due to our diverse and experienced team, which includes experts in interior design, marketing, finance, and technology. This multidisciplinary background allows us to tackle various aspects of business growth effectively and innovatively.

Our global competitors primarily operate within regional boundaries. Notable competitors include Programa, Archify, and SketchUp, each vying for market share within their respective regions. However, Linetype distinguishes itself through its scalable platform, diverse team composition, and readiness to adapt to regional challenges. With a keen focus on innovation and a commitment to addressing the unique needs of each market, Linetype is well-positioned to surpass regional competitors and establish itself as a leader in the global interior design landscape.

1. **Expertise in Digitization:** Our team excels in the digitization of assets, with particular strength in creating high-quality 3D models and BIM (Building Information Modeling) models. This expertise ensures that our digital offerings are both comprehensive and precise, catering to the needs of modern designers.
2. **Integration with Design Software:** We prioritize user-centric features to address common industry pitfalls. Linetype's platform is designed for seamless integration with various design software commonly used in the industry. This compatibility enhances the workflow for designers, allowing them to incorporate our models into their typical design processes without any disruption.
3. **Social and Gamification Interactive Features:** We are developing social interactive features within our platform to foster a community where users can share ideas, seek inspiration, and collaborate. Accessible tools to democratize the design process.
4. **Empowering All Users:** Linetype's mission is to empower anyone to become a designer, regardless of their experience level. Our interior modeling game and accessible tools enable users to create and customize their living spaces, demo

cratizing the design process.

These competitive edges position Linetype uniquely in the market, enabling us to attract a broad user base and drive innovation in the interior design industry. Additionally, our completion of beta testing and the availability of a functional web application further solidify our readiness to enter the market.

6) Technology - Patents and proprietary technology

At Linetype, we have developed technology that forms the backbone of our platform, positioning us strongly for expansion into the Korean market.

Our existing platform boasts robust features, including transaction capabilities and a strengthened database infrastructure, ready to support seamless operations in Korea from day one. Additionally, we have developed a wireframe prototype of our innovative interior design game, demonstrating our commitment to staying ahead of market trends and providing engaging experiences for our users.

While we do not currently hold patents, our focus has been on building a scalable and user-centric platform that addresses the evolving needs of the interior design industry. Our technology is the result of extensive research and development, guided by insights from our diverse team of experts.

This readiness with advanced features and innovative prototypes underscores our preparedness to enter the Korean market swiftly and effectively, ensuring that Linetype remains at the forefront of digital innovation in interior design.

We are actively researching the integration of photogrammetry technology into our onboarding processes. This cutting-edge technology has the potential to revolutionize how users onboard onto our platform, allowing for quicker and more seamless experiences. By leveraging photogrammetry, we aim to expedite the onboarding process for both vendors and designers, enabling them to efficiently digitize assets and integrate them into our platform with ease.

3. Plans to enter the Korean and Asian markets

1) Korean and Asian market analysis

Korean Market Analysis:

1. Similarities with Singapore:

- Increased online furniture sales, indicating a shift towards digital consumption.
- Demand for efficient design documentation and access to diverse product catalogs.
- Growing interest in interior design fueled by lifestyle changes during COVID-19.

2. Differences:

- The Korean market may have unique preferences and cultural influences compared to Singapore.
- Higher internet penetration rate in South Korea might offer greater digital adoption opportunities.

3. Expansion in Asia:

- Linetype's scalable platform allows for seamless expansion into neighboring Asian countries.
- The rising popularity of "play-to-earn" models presents a significant opportunity for Linetype to tap into the gaming culture prevalent in these markets.
- Recognizing the importance of design in Asian lifestyles, Linetype aims to address this underserved market with its user-friendly and innovative solutions. Linetype is strategically positioned to capitalize on this momentum by offering social media integration and fostering user discretion through immersive experiences like our interior design game.
- The diverse team at Linetype, including a Korean member, is equipped to adapt and tackle challenges that arise during market entry into Korea and other Asian countries.

4. Addressing Raw Material Shortages and Supply Chain Disruptions of Korea's Market

- **Rising Costs of Raw Materials:** The price of domestic pine trees has increased dramatically, from 70,000 won (\$56.5) per ton in 2021 to 95,000 won in 2023. This near 30% increase in a single year reflects the high demand and limited supply of raw materials (Yang et al., 2023).
- **Decreased Stockpiles:** Korean wood board manufacturers are struggling with reduced stockpiles of raw materials, which have fallen from a 15 to 30 days supply to just 3 to 7 days. This indicates a severe supply shortage and inability to maintain adequate inventory levels (Yang et al., 2023).
- **Production Disruptions:** The top five companies in the Korean wood panel market, which control over 80% of the market, have significantly increased the number of days they have had to suspend factory operations, from 71.4 days in 2021 to 235.7 days in 2022. This tripling of downtime underscores the impact of raw material shortages on production capacity (Yang et al., 2023).
- **Local Supply Insufficiency:** The industry's heavy reliance on local supply, combined with fast growth, has led to a mismatch between supply and

demand. The local supply cannot keep pace with the growing needs of the industry.

Asian Market Analysis:

1. Similarities with Korean and Singaporean Markets:
 - Increasing demand for personalized design solutions driven by lifestyle changes.
 - Emphasis on digitalization and efficient design processes.
 - Undervaluation of design despite its significance in Asian lifestyles.
2. Differences:
 - Each Asian market may have unique cultural nuances and regulatory environments.
 - Varying levels of internet penetration and technological adoption across different countries.
3. Expansion Strategy:
 - Linetype's platform is adaptable and scalable, **allowing for tailored approaches to penetrate diverse Asian markets.**
 - By leveraging insights gained from the Singaporean and Korean markets, Linetype aims to refine its strategies for expansion across Asia such as Malaysia, Indonesia and Vietnam where the industry shares major similarity pain points and processes.
 - The team is already in talks with vendors outside of Singapore.
 - The team's ability to adjust and overcome challenges, coupled with the presence of a Korean member, enhances Linetype's readiness to navigate the complexities of Asian markets effectively.

Through strategic market analysis and a scalable platform, Linetype is poised to make a significant impact not only in the Korean market but also across Asia, addressing the growing demand for innovative design solutions in the region.

2) Competitors in Korean and Asian market and your competitiveness

In the competitive landscape of the South Korean market, Linetype faces prominent competitors such as Ohouse and Hanssem. Despite their presence, Linetype distinguishes itself through several key strengths:

1. Expertise in Digitization:

- Linetype excels in the digitization of assets, boasting a team with a proven track record in creating high-quality 3D models and BIM (Building Information Modeling) models. This expertise ensures that Linetype's digital offerings are comprehensive and precise, meeting the exacting standards of modern designers and setting Linetype apart from competitors.

2. Integration with Design Software:

- Linetype's platform is seamlessly integrated with various design software commonly used in the industry such as sketch up and AutoCAD. This compatibility enhances the workflow for designers, allowing them to incorporate Linetype's models into their typical design processes without disruption. This advantage positions Linetype as a preferred choice for designers seeking efficiency and flexibility in their workflows.

3. Social Interactive Features:

- Linetype is developing social interactive features within its platform to foster a vibrant community where users can share ideas, seek inspiration, and collaborate. By prioritizing social interaction, Linetype aims to keep users engaged and increase overall user retention. This focus on community building distinguishes Linetype as a platform not only for design but also for fostering connections and creativity among its users.

By leveraging its expertise in digitization, seamless integration with design software, and commitment to fostering a vibrant community, Linetype is poised to outperform

competitors and establish itself as a leader in the South Korean market.

3) 'Incorporation status in Korea and future strategies

As of now, Linetype is not yet incorporated in Korea, but we are actively planning our entry into the Korean market with a comprehensive strategy:

1. Incorporation Plans:

- Linetype is in the process of exploring various options for incorporation in Korea, including establishing a local entity or partnering with existing entities to facilitate market entry. We are committed to ensuring compliance with local regulations and establishing a strong legal and operational foundation in Korea.

2. Alignment with Mission and Vision:

- Linetype is more than just a startup; we're a passionate community dedicated to revolutionizing the world of spatial design. Founded from an idea, our mission is to tackle the intricate challenge of translating drawings into tangible furnishings and materials.
- Our mission at Linetype is to redefine the boundaries of spatial design by providing innovative solutions that bridge the gap between imagination and reality. We are committed to empowering spatial designers and enthusiasts alike with tools that simplify the complex process of transforming ideas into tangible, awe-inspiring spaces.

3. Expansion into Southeast Asia:

- In addition to entering the Korean market, Linetype has plans to expand into the [Asian market](#). Our highly scalable platform allows us to seamlessly adapt to new markets and scale our operations efficiently. We are already in discussions with overseas vendors and exploring opportunities to establish partnerships in the region. This expansion aligns with our vision of empowering spatial designers and enthusiasts across Asia with innovative design solutions.

By aligning our incorporation plans with our mission and vision, Linetype aims to est

abish a strong presence in Korea, expand into Southeast Asia, and fulfill our commitment to revolutionizing the spatial design industry on a global scale.

4) Korean market entry and settlement/penetration plans

As Linetype prepares to enter the Korean market, one of our key initiatives is the development and launch of a mobile application tailored specifically for the Korean audience. This strategic move aligns with our commitment to providing accessible and convenient solutions to users, thereby enhancing our penetration and settlement in the Korean market.

Mobile Application Development:

1. **User-Centric Design:** Our applications will be designed with a user-centric approach, taking into account the preferences, behaviors, and needs of Korean users. This includes intuitive navigation, seamless functionality, and culturally relevant design elements.
2. **Feature-Rich Experience:** The applications will offer a feature-rich experience, mirroring the capabilities of our web platform while optimizing for mobile devices. Users will have access to key functionalities such as proposal creation, access to 3D models, and social interaction features, all from the convenience of their smartphones.
3. **Freemium:** By launching a mobile application, we aim to make Linetype more accessible to Korean users, enabling them to engage with our platform anytime, anywhere, and at a low cost. This accessibility will facilitate greater user adoption and engagement, driving our penetration and settlement in the Korean market while keeping the cost burden low for users.
4. **Localized Content and Support:** The mobile application will feature localized content and support, including language localization, culturally relevant content, and customer support services tailored to the Korean market. This localization strategy will enhance the user experience and foster a stronger connection with Korean users.
5. **Platforms For Entry:** The current market conditions in Korea, particularly the widespread use of social media platforms, present an opportune moment for Linetype to enter. Listing our application on web stores or sites like product hunt, coupled with the Korean population being highly active on social media, makes it conducive for Linetype to leverage digital marketing channels and engage with potential users effectively. Moreover, the increasing demand for innovative design solutions and the growing interest in interior design present a favorable environment for Linetype to establish itself as a leader in the Korean market.

By prioritizing the development and launch of a low-cost web and mobile application tailored for the Korean market and leveraging favorable market conditions, Linetype aims to enhance user accessibility, engagement, and satisfaction, ultimately strengthening our penetration and settlement in Korea. This strategic initiative underscores our commitment to providing innovative solutions that empower spatial designers and enthusiasts across the globe.

5) Plans to get more than 1,000 paying customers or 10 corporate customers in the Korean and Asian market

As Linetype aims to expand its presence in the Korean and Asian markets, we have devised comprehensive strategies to acquire a significant customer base, including both individual users and corporate clients:

Value-Driven Proposition:

- Emphasize Linetype's unique value proposition and benefits to potential customers, highlighting features such as advanced digitization capabilities, seamless integration with design software, and social interaction features. Demonstrate how Linetype can streamline their design processes, enhance collaboration, and drive business growth.

Community Building

- Develop workshops and pop-up events in collaboration with cafes to host interior design workshops, fostering a sense of community and engagement.
- Participate in events and fairs such as the Seoul International Furniture & Interior Fair and home & office events in South Korea to showcase Linetype's capabilities and attract potential customers.
- Implement a "play-to-earn" model, offering incentives for users to engage with the platform and rewarding them for their contributions, thereby building a vibrant and active user community.

4. Team

1) Founder's highlights

Founder's Hands-On Approach:

As the founder of Linetype, Alice is deeply committed to ensuring the success of the platform. From the outset, I have taken a hands-on approach to product development and testing, conducting our first beta testing phase to gather valuable feedback from users. I am actively engaged in working with vendors to enhance the site and ensure that it meets the needs of our users.

Background and Expertise:

With over four years of experience as a design drafter, I bring a wealth of knowledge and expertise to Linetype. My hands-on experience in the design industry has provided me with invaluable insights into the needs and pain points of designers and clients. I have a track record of success, including awards such as the Silver Award at the Golden Lotus International Design Competition and the Bronze Award at the Singapore Interior Design Awards (SIDA) 2020, which underscore my commitment to excellence in the field.

2) Founder's previous startup and/or related experience

Startup Experience:

Alice brings a wealth of experience in startups and the entrepreneurial ecosystem, having played a pivotal role in identifying growth opportunities, conducting market research, and developing sales strategies. Her hands-on approach extends across all facets of Linetype's operations, from product development to sales and marketing. Furthermore, My hands-on approach extends to all aspects of the business, from product development to sales and marketing. Additionally, Linetype is supported by leading tech companies such as AWS and Google for startups programmes, providing valuable resources and infrastructure for our growth and innovation initiatives.

In addition, Linetype has received support from Enterprise Singapore, the leading government agency championing enterprise development. This support underscores our commitment to excellence and innovation, providing us with invaluable resources and guidance as we continue to grow and scale our business. With the backing of Enterprise Singapore, Linetype is well-positioned to achieve our vision of revolutionizing the interior design industry and making a positive impact on individuals and communities worldwide.

At NUS Enterprise, I have spearheaded the planning and execution of the NUS Enterprise Programmes, overseeing various components and working closely with the management team to ensure a valuable experience for all.

In a nutshell, Alice utilized design thinking principles to enhance any team that I in through different projects in design, logistics management, and facilitated effective communication among stakeholders, showcasing her ability to lead and innovate in dynamic environments.

3) Number of full-time employees

3

4) Background, roles, and strengths of co-founders and core members

1. **Alice Lim:** With a strong background in interior design and expertise from various ecosystems, Alice brings industry knowledge and a diverse perspective to Linetype. Her experience ensures that the platform meets the needs of designers and users alike, fostering innovation and user-centric design.
2. **Valerie Eap:** Valerie contributes entrepreneurial experience, a corporate growth perspective, and marketing expertise to Linetype. As the former head of marketing for top local brands in Singapore, she brings valuable insights into brand positioning, customer engagement, and market dynamics, driving Linetype's growth trajectory with strategic marketing initiatives.
3. **Ben Tam:** Ben is instrumental in building and optimizing Linetype's backend infrastructure and leading the tech team. His expertise ensures the platform's reliability, scalability, and technological innovation, laying the foundation for Linetype's success in the digital space.
4. **Ryan Koh:** With experience in commercialization, sales, go-to-market strategies, and fundraising, Ryan plays a pivotal role in Linetype's business development efforts. His deep tech background and strategic insights drive Linetype's market penetration and revenue growth, expanding the platform's reach and impact.
5. **In Gyu Song:** As Linetype's Korean team member, In Gyu brings expertise in data labeling for machine learning and cultural insights into target locales. His experience ensures that Linetype's platform is culturally relevant and linguistically appropriate for the Korean market, enhancing user engagement and adoption.
6. **Lee Hyunwoo:** As Linetype's Korean team member, HyunWoo Brings knowledge and network in the investment industry from his experience working with South Korea venture capital firms. He is able to leverage financial acumen and his networks to drive strategic growth.

5) Gaps in your current team composition and future hiring plans

Gaps in Current Team Composition:

1. **Industry Expertise in Korea:** While our team possesses diverse expertise, we recognize the importance of having a member with direct experience and insights into the design industry in Korea. This individual would provide invaluable knowledge of local trends, preferences, and market dynamics, enhancing our ability to tailor Linetype's offerings to the Korean market.
2. **Mentorship:** As we navigate the complexities of scaling our startup and entering new markets, mentorship from seasoned professionals in the design and entrepreneurship space would be invaluable. Their guidance and mentorship could help us navigate challenges, make informed decisions, and accelerate our growth trajectory.
3. **Business Development in Korea:** To effectively penetrate the Korean market, we require a business development specialist with a deep understanding of the local industry landscape. This individual would spearhead our efforts to establish strategic partnerships, cultivate client relationships, and drive business growth in Korea.

Future Hiring Plans:

In line with our growth objectives and the identified gaps in our team composition, Linetype plans to make strategic hires to augment our capabilities and expand our market presence. Specifically, we intend to hire:

1. **Design Industry Expert (Korea):** We are actively seeking an individual with extensive experience and networks within the design industry in Korea. This individual will play a crucial role in providing insights into local market trends, establishing partnerships with key stakeholders, and ensuring the relevance and competitiveness of Linetype's offerings in the Korean market.
2. **Mentor:** Linetype is seeking a seasoned mentor with a successful track record in entrepreneurship and the design industry. This mentor will provide guidance, advice, and support to our leadership team, helping us navigate challenges, capitalize on opportunities, and achieve our strategic objectives.
3. **Business Development Specialist (Korea):** To drive our expansion efforts in Korea, Linetype plans to hire a business development specialist with a deep understanding of the local market and industry dynamics. This individual will be responsible for identifying growth opportunities, forging strategic partnerships, and executing go-to-market strategies tailored to the Korean market.
